- **Maine Analytical Strives to exceed standards. Samples are tested in duplicate on validated methods, calibrated with Certified Reference materials to ISO 17025 Standards.**
- **Maine Analytical is dedicated to the ISO 17025 Standard and is Pending accreditation with Perry Johnson Laboratory Accreditation INC.**
- Liquid samples are tested by weight for accuracy. MCT and most oil tinctures are 0.95 grams/ml
- %=(W/W)=Percent(Weight of Analyte/Weight of Product)
- Total Cannabinoid Results are the sum of all cannabinoids detected.
- Maximum Potential THC and CBD is calculated to account for the loss of the carboxyl group during the common decarboxylation step.
- ** Max Potential THC = Total THC+ (Total THCA x .877)
- ** Max Potential CBD = Total CBD+ (Total CBDA x .877)
- Analytes Marked with * do not meet ISO 17025 standards because these analytes have their calibration verified by only one company's certified reference standards.
- Analytes not marked with * meet ISO 17025 standards because they are verified by two different companies certified reference standards every day testing takes place.
